RE: Student Recruitment Process

Dear Hiring Manager:

I am ecstatic to learn about the opportunity 45Drives is offering NSCC's second year IT students to begin the recruitment process at your awesome company. I am excited not only because this is the perfect opportunity for me to apply the knowledge, skills, and abilities I have gained through my education at NSCC, but more importantly because it will allow me to contribute my talents to a *local* employer with a reputation for creating rewarding employment opportunities for youth in Cape Breton.

As a second-year IT programming student at NSCC, I have experience developing software applications using programming languages including HTML, CSS, JS, PHP, VB, Java, C, C++, and SQL. My goal is to become a full-stack developer as this would grant me not only the opportunity to create simple yet effective graphical user interfaces using my creativity and attention to detail, but also utilize my analytical and problem solving skills to develop software solutions to complex problems. I also really enjoy the process of learning how to integrate front- and back-end technologies to design and develop fully functioning software applications, and believe this skillset would be a valuable asset to current and upcoming projects at 45Drives.

I am eager to start giving back to the open-source community as part of your hard-working yet fun-loving team of IT professionals. Please contact me at **1 (902) 577-6546** or **tylergreen110@hotmail.com** so that we may discuss how I can start contributing to some of the world-changing projects taking place at 45Drives.

Thank you in advance for your time and consideration,

Ty Green
